1. My (Risk) Advisor Growth Plan

This section provides a logistics, goal setting and cash flow model to enable (Risk) advisors to determine where best to focus their energies. The planning is supported with a communication and positioning template to aid the advisor in the selection of 'A' client profile criteria.

This material is for Risk Advisors only and is of a medium complexity level.

Benefits

- How it helps the business owner (the client): Business owners benefit by receiving customized service offerings that align with their specific business size and needs. For example, smaller businesses with less than 5 staff receive basic risk and feasibility assessments, while larger enterprises (50+ staff) benefit from formal risk management and share transfer structures.
- How it helps the advisor: It provides a structured framework for the advisor to define their ideal target audience (the 'A' client), categorize their service offerings into broad, niche, and exclusive tiers, and formulate a clear outreach strategy to existing clients based on their current relationship dynamics. It also helps them crystallize their marketing messaging and build a concrete action plan.
- Who it may be suitable for: This template is highly suitable for insurance and financial advisors who are looking to strategically grow their practice, refine their target market, and systemize their marketing and client outreach efforts.

How to use the material in practice

1. Define your Target 'A' Client Profile: Begin by reviewing your top current clients. Outline their demographics (e.g., industry, revenue capability, number of staff) and describe their "Goldilocks State"—the ideal combination of a client's knowledge, resources, environment, and attitude that allows you to do your best work.
2. Determine your Service Offer Spread: Map out what services you will provide based on the client's business size. Assign specific services and core messaging to "Broad" (less than 5 staff), "Niche" (less than 50 staff), and "Exclusive" (50+ staff) markets.
3. Plan your Approach to Existing Clients: Categorize your existing clients based on their relationship status (e.g., "Warm & Receptive" vs. "Warm but Wary"). Match the relationship status with the prescribed approach method, such as a direct phone call, a pre-approach email, or sending a gift, to strategically guide them into a discovery meeting.
4. Build your Promise: List the 5-6 broad problems your target clients face, narrow them down to the 3 main problems they desperately want fixed, and synthesize these into a

single core promise. Identify constraints to purchasing premium services and plan how to deliver solutions in manageable stages.

5. Formulate Key Marketing Statements: Clearly write down who you work with, the ultimate goal you help them achieve, what the client must do for the outcome to be successful ("The Magic Happens When"), and what makes your practice unique.
6. Execute the Action Plan: Complete the final module by assigning specific actionable tasks, designating who is responsible for them, and setting firm deadlines.

Common Q&A

1. What is the "Goldilocks State" when profiling a client? It refers to the optimal conditions that must be present for an advisor to do their best work with a client. This is evaluated across four categories: the client's Knowledge, Resource availability, Environment, and Attitude.
2. How should I approach a client who is "Warm but Wary" and guarded? You should use a Pre-Approach E-Mail followed by a Phone Call. This method requires a two-step discovery process, allowing you to position the meeting effectively before actually conducting it.
3. What services are best suited for an "Exclusive" market target? For an exclusive market consisting of companies with 4 or more private shareholders and 50 or more staff, the recommended service focus is Share Transfer & Formal Risk Management.
4. Why do I need to identify my clients' constraints when building my promise? Identifying legitimate constraints helps you understand what stops clients from purchasing premium services from you, allowing you to structure your offerings in stages or at different price points.
5. What is the purpose of the "Magic Happens When" marketing statement? This statement defines the client's responsibility and the part they must play in ensuring a successful outcome when working with the advisor.

2.Risk Advisor Growth Plan Tutorial Video

This video provides ‘click by click’ support to help the advisor use the model and template..
This material is for Risk Advisors only and is of a medium complexity level.

Benefits

- How it helps the business owner (the client): By experiencing the advisor using this scenario modeling on themselves, the business owner gains secondary benefits. The advisor develops personal experience using financial feasibility tools, translating to better guidance when helping the business owner get clarity around their own commercial numbers.
- How it helps the advisor: It helps the advisor determine exactly where they should be spending their time to reach probable revenue targets. It models assumptions around conversion ratios, time allocation, and commission structures, while also highlighting time deficits or unachievable goals before the year begins.
- Who it may be suitable for: Advisors and practice managers who want to forecast their earnings, balance their client acquisition goals against their actual available working hours, and run best-case/worst-case revenue scenarios.

How to use the material in practice

1. Set up the Google Sheet Environment: Open the model, utilize the grouped sections to hide or unpack views as needed, and use the "Version history" feature to name and save different scenarios (e.g., "best case" vs. "worst case").
2. Input Client API Calcs: Enter your expected product mix, commission percentages (e.g., upfront and volume for life insurance), lapse rates, and GST expectations for each client tier (e.g., Gold, B, C, D clients).
3. Define Meeting Hours and Conversion Ratios: Input the estimated percentage of prospects who will agree to an introduction, proceed to discovery, and ultimately purchase. Assign the hours required for each stage of the client journey: introduction meeting, scoping, analyzing, and implementation.
4. Balance Available Time: Enter your annual leave days and average effective working hours per day. Review the tool to see if you have a time surplus or deficit based on your client targets. Adjust the number of target clients or the time spent on internal tasks (like staff development) until your time allocation balances at 100%.
5. Map the Yearly Activity Plan: Distribute your targeted clients across the year based on your available working days and expected conversion timelines. Ensure the inputs align so you can accurately forecast when sales will drop.
6. Calculate Splits and Year One Earnings: Input your specific business structure details, such as base salary, commission split percentages, service years bonuses, and management hour contributions. Finally, input your operating expenses and opening bank balance to review your projected year-end cash flow and GST liabilities.

Common Q&A

1. What is the core purpose of the sales logistics and marketing tool model? It is a scenario model used to determine where an advisor should spend their time, evaluating what level of revenue is probable based on combined assumptions of advisor skill and market acceptance.
2. How can I run multiple financial scenarios without breaking the model? You can use Google Sheets' "Version history" feature to name and save different states (like a "best case" and a "worst case"), allowing you to easily switch back and forth to compare scenarios.
3. What happens if the model shows I am using over 100% of my available time? You will receive a warning that your allocation of time doesn't add up. You must then manipulate your levers by either reducing your target number of clients or reducing the hours spent on specific operational tasks (like staff improvement).
4. Why is it important to track actual conversion success against the model's assumptions? Tracking actuals allows you to determine if a shortfall is due to a lack of skill or unexpected market resistance. This dictates whether you need to increase your activity volume or improve your sales technique.
5. How are earnings calculated for a standalone operator versus a group advisor? A standalone operator keeps 100% of their sales to cover their own expenses and taxes, so the model adjusts to remove salary inputs. An advisor in a larger group might have base salaries and specific commission splits applied to their productivity tiers.
6. What is a management hours contribution in the split calcs? It is an earning split bonus provided to an advisor who dedicates a specific number of hours to internal training, support, or mentoring for the wider team.

3.Accountant Advisor Content

This section provides a logistics, goal setting and cash flow model to enable advisors to determine where best to focus their energies. The planning is supported with a series of communication and positioning templates to aid the advisor in the selection of ‘A’ client profile criteria.

This material is for Advisors only and is of a medium complexity level.

My Improvement Plan is suited to advisors on a general career path.

My Fee Growth is suited to advisors who manage an existing fee base and/or intend to actively grow their fee base as part of their partnership aspirations.

"My Improvement Plan" Benefits

- How it helps the business owner: It drives continuous improvement by ensuring advisors intentionally observe market trends and client needs, thus elevating the firm's overall service quality.
- How it helps the advisor: It establishes a clear framework **(Review, Observe, Prepare, Do)** for developing skills "On Purpose," turning everyday client interactions into structured learning opportunities.
- Who it may be suitable for: Advisors seeking to self-correct and improve their service delivery, confidence, and empathy in client interactions. **NOT focused on fee growth or on partnership pathway.**

How to use the material in practice

1. Map the Landscape: Start with the "Global Overview" by listing 3 things that concern you, excite you, and equally affect both the firm and clients in the accounting industry. Move to the "Local Overview" to outline tasks you would/wouldn't do in a perfect week and note 3 things needed to achieve more perfect weeks.
2. Observe: Look at your top 5 clients' trading environments. List 3 things you've observed, 3 common problems they encounter, and the 3 information sources that gave you this view.
3. Prepare: Identify 3 services the firm could provide or improve to help clients cope with the observed problems. List 3 things you need to learn to play your part, and define 3 actions to prepare your skills, confidence, understanding, and empathy.
4. Do: Select up to 3 clients to approach with these improvements. Commit to 3 things you will do "by design" to work with an open heart and an open mind. Finally, list the steps required to secure and deliver the service from the client's perspective.
5. Review: Reflect without judgment. List 3 things learned from the customer-focused experience, 3 outcomes enjoyed by the client, and 3 things you would do differently in the future regarding preparation and delivery.

Common Q&A

- Q: What is the 4-part cycle for developing skills "On Purpose"? A: The cycle consists of Review, Observe, Prepare, and Do.
- Q: What is the most important view when reflecting on your work? A: Client "impact" is always the most important view.
- Q: What should you list in the "Observe" phase? A: 3 things observed about the client's trading environment, 3 common problems encountered, and 3 information sources that enabled your view.

- Q: How does the template instruct advisors to deliver their service during the "Do" phase? A: Deliver the service even if it's not "perfect," and work with an open heart and an open mind so clients feel the difference.
- Q: What factors should be considered in the "Review" phase? A: Things observed/learned, outcomes enjoyed by the client, and what you would do differently regarding preparation and delivery next time.

"org.4. My Fee Growth Plan" Benefits

- How it helps the business owner: Clearly maps out the firm's strategic target markets, aligning marketing messages with distinct service tiers (broad, niche, exclusive).
- How it helps the advisor: Provides a tactical playbook for approaching existing clients based on relationship temperature, and helps distill complex client problems into a single, compelling promise.
- Who it may be suitable for: Advisors crafting a go-to-market strategy, defining their ideal client avatars, and building communication templates for upselling existing clients. **These advisors ARE focused on fee growth.**

How to use the material in practice

1. Define Your 'A' Client: Use the demographics prompt (size, location, revenue) and the Goldilocks State prompt (Knowledge, Skill, Resource, Environment, Attitude) to document who challenges you and what must be present for you to do your best work.
2. Map Your Service Spread: Categorize your target market into Broad, Niche, and Exclusive tiers. Assign a specific Service and a core Message (e.g., "We help you clarify your vision") to each.
3. Tailor Your Approach: Check the "Relationship Status" of your existing clients. If they are "Warm & Receptive," use a direct phone call. If "Warm but Wary," use a Pre-Approach E-mail then Phone Call.
4. Build Your Promise: Identify 5-6 broad problems your clients face, narrow them down to the 3 main things they want fixed, and summarize these into 1 Big Promise. Outline legitimate constraints and how you will deliver this promise in stages.
5. Draft Marketing Statements & Action Plan: Clearly articulate "Who I Work With," "What I Help Them To Achieve," "The Magic Happens When," and "What Makes Me Unique". Finally, assign specific Tasks, to Whom, and When in the Action Plan.

Common Q&A

- Q: What two categories define the Target 'A' Client Profile? A: Demographics and the 'Goldilocks State'.

- Q: What elements make up the client's "Goldilocks State"? A: Knowledge, Skill, Resource, Environment, and Attitude.
- Q: What are the three target market levels in the Service Offer Spread? A: Broad, Niche, and Exclusive.
- Q: How should an advisor approach a client who is "Cool to new ideas, need time to reflect"? A: Through Group Positioning via a Seminar to introduce the concept, followed by an invitation to a discovery session.
- Q: What are the four Key Marketing Statements? A: Who I Work With, What I Help Them To Achieve (My 1 Big Promise), The Magic Happens When (Their Part in Successful Outcome), and What Makes Me Unique.
- Q: What is required to "Build My Promise"? A: Outlining 5-6 broad common problems, the 3 main problems clients want fixed, summarizing those into 1 promise, defining legitimate constraints, and plotting how to deliver the promise in stages.

"Org.5. My Fee Growth Model" Benefits

- How it helps the business owner: Provides massive, granular visibility into capacity planning, revenue forecasts, client distribution curves, and the breakdown of compliance vs. advisory billing.
- How it helps the advisor: It mathematically breaks down the hours required for delivery, business development, upskilling, and non-chargeable time, allowing them to see exactly how their activity translates to fee growth.
- Who it may be suitable for: Practice managers, senior partners, and advisors who need a highly analytical, data-driven approach to map out billing targets, job scheduling, and client portfolio rebalancing.

How to use the material in practice

1. Analyze the Client Base: Input your clients to categorize them by P.A. Fee Ranges (1,500*upto*>35,000) and track the total number of engaged clients versus non-engaged.
2. Estimate the Client Curve: Distribute your clients across the growth curve (Design, Launch, Break-even, Lifestyle, Leverage, Reach, Leapfrog, Maturity, Exit/Decline) to understand the revenue mix.
3. Categorize Client Value: Group clients into Growth, Maintain, Service, and Transition buckets to see where the majority of your $333,050 (or relevant total) fee base lies. Determine client autonomy levels (Full Autonomy, Check First, Other).

4. Set Time & Fee Assumptions: Use the "Assumptions" tab to calculate total yearly available work hours (subtracting leave, public holidays, sick days) and allocate targeted percentages to compliance (e.g., 70%) versus advisory work.
5. Track Monthly Logistics & Ratios: Use the "Mthly Logistics" and "Selling Ratios" tabs to monitor how many prospects must be approached and converted to meet the target fee growth (e.g., $96,000), tracking specific sales hours and delivery hours required per month.

Common Q&A

- Q: What are the four main Client Category Values used to segment the fee base? A: Growth, Maintain, Service, and Transition.
- Q: What phases make up the "Client Curve Estimates"? A: Design, Launch, Break-even, Lifestyle, Leverage, Reach, Leapfrog, Maturity, and Exit/Decline.
- Q: How are client relationships categorized by Autonomy? A: Full Autonomy, Check First, and Other.
- Q: What metrics are factored into the Total Yearly Hours available for a person? A: Total Days Annual Leave, Public Holidays, Sick Leave, and Study Leave/Training/Conferences.
- Q: What types of tasks reduce available weekly delivery hours? A: Non-chargeable time, which includes networking, marketing, selling strategic services, skills/resource development, and team skills development.

Coaching 1/4 Agenda" Benefits

- How it helps the business owner: It provides a structured overview of the advisor's weekly progress and creates a direct feedback loop to ensure strategic targets and learning milestones are met.
- How it helps the advisor: It categorizes weekly responsibilities into actionable groups, forces reflection on what is working or failing, and specifically highlights operational "blockers" that are hindering success.
- Who it may be suitable for: Advisors participating in performance coaching, or management teams needing a standardized accountability tracking tool for their staff.

How to use the material in practice

1. Reflect on the Past: Begin by documenting the previous week's performance. Clearly state "What went less well?" to identify failures, followed by "What went well?" to reinforce successes.

2. Plan Preparation: Outline your ‘Get Organised’ actions for the coming week. This includes planning, learning, and rehearsing new skills.
3. Plan Prospecting: Determine your ‘Get the Job’ actions. Map out specific pre-approach tactics, phone calls to make, and proposals to send.
4. Plan Execution: Schedule your ‘Do the Job’ actions. This requires blocking out time for client account/template preparation, conducting actual meetings, and managing meeting follow-ups.
5. Identify Blockers: Explicitly list what is "Blocking" you from moving forward so it can be addressed in coaching.
6. Additional Thoughts: Use the "Other Notes" section for miscellaneous planning or conversational points.

Common Q&A

- Q: What is the primary purpose of the "Get Organised" section? A: It is dedicated to planning, learning, and rehearsing before interacting with clients.
- Q: What types of tasks belong in the "Get the Job" category? A: Pre-approach tactics, phone outreach, and submitting proposals.
- Q: What activities are considered "Do the Job"? A: Client account/template preparation, conducting the meetings, and doing the meeting follow-ups.
- Q: How does this template measure historical progress? A: It requires the user to explicitly define what went less well and what went well with regard to the last week.
- Q: What should an advisor do if they are stuck on a task? A: They should document it in the "What’s ‘Blocking’ you from moving forward?" field to highlight the issue.

-

"Org.Entertainment Schedule - Sheet1" Benefits

- How it helps the business owner: It imposes a strict budget and ROI expectation on networking activities, ensuring that entertainment expenses are strategic rather than arbitrary.
- How it helps the advisor: It forces the advisor to set a clear, actionable objective and prepare specific collateral (notes) before engaging with a client or center of influence.

- Who it may be suitable for: Business development personnel, relationship managers, and advisors executing outbound networking and partnership building.

How to use the material in practice

1. Schedule the Event: Log the specific Month and Date of the planned interaction.
2. Identify the Target: Fill in the name of the Client or Centre of Influence, along with their associated Organisation.
3. Define the Format: Specify the Activity type, such as a Lunch or Morning Tea.
4. Set the Objective & Budget: Clearly define the objective of the meeting (e.g., "Establish early relations" or "discuss cross marketing"). Assign a specific dollar budget for the activity.
5. Prepare Notes: Add actionable preparation items in the Notes column, such as remembering to bring a specific matrix pad or a promised item.

Common Q&A

- Q: What are the column headers used to track networking? A: Mth, Date, Client or Centre of Influence, Organisation, Activity, Objective, Budget, and Notes.
- Q: Who are the primary targets for this schedule? A: Clients or Centres of Influence.
- Q: Does the template require tracking expenses? A: Yes, there is a dedicated "Budget" column to track expected expenses like $150 or $25.
- Q: What is an example of a listed Activity and Objective? A: A Lunch with the objective to "Develop relations, discuss making relations more formal in terms of cross marketing".
- Q: How should the "Notes" column be utilized? A: To log specific preparatory reminders, such as taking a golfing cartoon or preparing to draw the heald matrix.

"relationship staircase" Benefits

- How it helps the business owner: Offers a psychological framework to visualize and manage client loyalty and retention by moving relationships beyond transactional boundaries.
- How it helps the advisor: Provides a literal, step-by-step pathway to escalate intimacy and trust with a client, ensuring they know exactly what interaction comes next to deepen the bond.
- Who it may be suitable for: Client-facing advisors, relationship managers, and sales teams who need a roadmap for converting professional acquaintances into trusted personal contacts.

How to use the material in practice

1. Assess the Foundation: Evaluate your current client relationship against the Johari window matrix (Arena, Blind Spot, Facade, Unconscious) to understand open vs hidden communication.
2. Initiate Business Contact: Start at the base of the staircase with a purely professional interaction: the “Howz Bizz” Phone Call.
3. Bridge to Casual: Escalate slightly by sending a "Funny Email" followed by an in-person "Coffee Chat".
4. Pivot to Personal: Transition the relationship from business to personal by making a “Howz Life” Phone Call, then scheduling a Lunch or Golf outing.
5. Achieve High Intimacy: Secure top-tier relationship status through highly social events such as a Boozy Session, Dinner With Spouse, or going to the Movies.

Common Q&A

- Q: What is the first step at the bottom of the relationship staircase? A: The “Howz Bizz” Phone Call.
- Q: What step transitions the conversation from business to personal well-being? A: The “Howz Life” Phone Call.
- Q: What activities represent the highest levels of the relationship staircase? A: A Boozy Session, Dinner With Spouse, and Movies.
- Q: What psychological matrix is displayed alongside the staircase? A: A four-quadrant matrix containing Arena, Blind Spot, Facade, and Unconscious.
- Q: What interaction bridges the gap between a Funny Email and the "Howz Life" call? A: A Coffee Chat.
