
Branch Chain Logic Table

Logic Branch	IF (Condition / Trigger)	THEN (Action / Next Step)	Additional Context / Notes
Cognitive Dissonance / Bias	Client displays Confirmation Bias (reality not aligned with desires, searching only for supporting views while ignoring true reality).	Direct team thinking via structure/templates and apply Parallel Thinking (viewing the building from all 4 sides simultaneously).	Avoids anxiety and confrontation with true reality; prevents repeating same mistakes.
Exhaustion / Complacency	Client displays Complacency (exhaustion after sustained effort, unable to maintain focus, seeking to extract from day-to-day).	Apply the Leverage growth tactic under the Intelligence stage; establish delegated divisional roles and reporting channels.	Mind/body requires recovery of Cathexis/Libidinal energy; demands proven internal processes.
Succession Role Identification	Client displays Role-Identification during planned succession (acting out how a 'Boss' should, unable to 'get out of their own way').	Apply Succession layer principles to help client separate personal worth from business value.	Role identification creates inauthentic behavior and deep anxiety over 'lost self' post-succession.

Over-Exposure / Resistance to Change	Client displays Over-Exposure / Familiarity Principle ("this is how we've always done it", avoiding commitment to new strategies).	Challenge known assumptions; present external P.E.S.T insights and Porter's 5 Forces data to highlight risks of keeping what we have vs. achieving what we need.	Driven by desire to keep known safe; Kodak and Nokia cited as classic failures of this principle.
Marketing Conversion Deficit	Customer lead generation is high, but sales conversions remain low.	Conduct a Product (Fit) Review to evaluate customer purchasing resistance, competitor comparison, and customer motivation.	Indicates poor product-to-market fit or hoping customers do something they are not naturally motivated to do.
Premium Pricing for Full Delivery	Client wants to charge maximum fees while eliminating customer execution risk.	Structure offering under "For Them / Sorted for Maximum Fee" , providing detailed discovery, qualified diagnosis, tailored solution, and convenient execution.	Customers pay maximum fees when the problem completely disappears in a risk-free manner.

Corporate Merger / Amalgamation	Two family business entities wish to combine operations or merge without risking cultural failure.	Implement "Business Dating" with purchase valuations completed at outset and a 12-month right of fulfillment allowing clean withdrawal.	Prevents rushing into 'Marriage' on the first date and allows testing relationship strain under low risk.
Operational Volatility / Tampering	Process performance displays high frequency, low impact fluctuations (Common Cause).	Calculate standard deviation ranges (tolerance) and avoid 'Tampering' (over-reacting to common cause).	68% of data falls within 1 std deviation; over-reacting creates destabilization rather than control.
Product Life Cycle Saturation	Client's product curve approaches the peak of maturity before sales decline.	Apply the Sigmoid Curve model; interrupt growth curve at Point X to time introduction of a new product/service before decline.	Offsets initial negative outputs of new product development with ongoing cash flow from original line.
Red Water Market Saturation	Client is trapped in direct price/feature competition (Red Water Zone).	Execute Blue Ocean Strategy ; identify customer purchasing blockages/frictions on the fringes and remove them to create uncontested market space.	Focuses on removing frictions rather than competing within normal industry practices (e.g., Cirque du Soleil).

Group Meeting	3	meeting	Shift facilitation from	Consensus appeases
Disagreement	participants		consensus or the majority but	
	out-vote	1	argument thinking to	ignores critical
	participant who		De Bono's Parallel	cracks; parallel
	spots a critical		Thinking , directing	thinking yields
	structural flaw		everyone to inspect	collaborative truth.
	(Consensus		the exact same side	
	Thinking Trap).		together.
