Your Sales Process Decision Tree

The thinking behind your approach & delivery...

Existing Client Logic Branch	IF (Condition / Trigger)	THEN (Action / Next Step)	Additional Context / Notes
Path 1: Existing Client - Initial Assessment	**IF the prospect is an "Existing Client"...**	**THEN ask: "Client has done project or advisory work with you before?"**	Determines if the client is familiar with your advisory process.
Path 1: Existing Client - Prior Work (Yes)	**IF the client HAS done project or advisory work with you before...**	**THEN ask: "Are you confident enough to start the process in a more consultative manner?"**	Requires being less scripted/structured; you must 'think on your feet' to scope and draw to a conclusion.
Path 1: Existing Client - Consultative Approach (Yes)	**IF you ARE confident to start in a more consultative manner...**	**THEN "Approach & Engage via the 'Planning Outcomes Review' Doc & select appropriate planning session as a means to scope and upsell."**	Leads directly to engagement.
Path 1: Existing Client - Consultative Approach (No)	**IF you are NOT confident to start in a more consultative manner...**	**THEN "Approach for Education based session."**	Safely transitions to an education-first approach.
Path 1: Existing Client - Prior Work (No)	**IF the client has NOT done project or advisory work with you before...**	**THEN evaluate: "Client fits small business profile; you suspect fee resistance; client also lacks fundamental knowledge of basic $ management principles."**	Assesses financial sophistication and budget constraints.
Path 1: Existing Client - Needs Education (Yes)	**IF the client fits the small business profile, has fee resistance, and lacks fundamental knowledge...**	**THEN "Approach for Education based session."**	Educates the client to build value before pitching services.
Path 1: Existing Client - Post-Education Evaluation	**IF following an Education based session...**	**THEN ask: "Client enjoyed education session & wants more?"**	Tests client appetite for further engagement.
Path 1: Existing Client - Wants More Education (Yes)	**IF the client enjoyed the education session AND wants more...**	**THEN route back to evaluating: "Client fits small business profile; you suspect fee resistance..." node.**	Re-evaluates client profile after education has been provided.
Path 1: Existing Client - Wants More Education (No)	**IF the client did NOT enjoy the education session or want more...**	**THEN "'Park' process until client project pushes the need."**	Wait for a compelling event to re-engage.
Path 1: Existing Client - No Education Needed (No)	**IF the client does NOT fit the profile of fee resistance/lacking knowledge...**	**THEN evaluate: "Is the client smaller in size; growth focused but has only used you for compliance work or basic forecasting or tax issues?"**	Determines the scale of the sales approach.
Path 1: Existing Client - Smaller/Growth Focused (Yes)	**IF the client IS smaller in size and growth-focused (using you only for compliance/tax)...**	**THEN "Approach & Engage using the Lite Fundamentals (Campaign) sales process."**	Focuses on a streamlined campaign process.
Path 1: Existing Client - Larger/Complex Needs (No)	**IF the client is NOT smaller/growth-focused (meaning they likely have larger/complex needs)...**	**THEN "Approach & Engage using the Total Needs sales process."**	Focuses on a comprehensive sales approach.

Targeted Prospect Logic Branch	IF (Condition / Trigger)	THEN (Action / Next Step)	Additional Context / Notes
Path 2: Targeted Prospect - Initial Assessment	**IF the prospect is a "Targeted Prospect"...**	**THEN conduct a "First meeting [to reveal] client 'sophistication'."**	Initial discovery determines the prospect's level of sophistication.
Path 2: Targeted Prospect - Sophisticated (Yes)	**IF the first meeting reveals the client IS sophisticated...**	**THEN evaluate: "Client fits 'larger business' profile?"**	Sorts sophisticated clients by business size.
Path 2: Targeted Prospect - Not Sophisticated (No)	**IF the first meeting reveals the client is NOT sophisticated...**	**THEN evaluate: "Client fits 'smaller business' profile?"**	Sorts less sophisticated clients by business size.
Path 2: Targeted Prospect - Sophisticated + Larger	**IF the client is sophisticated AND fits the 'larger business' profile...**	**THEN "Approach & Engage using the Total Needs sales process."**	Deploys the most comprehensive sales process.
Path 2: Targeted Prospect - Sophisticated + Smaller	**IF the client is sophisticated but does NOT fit the 'larger business' profile...**	**THEN "Still use Lite Fundamentals sales process but modify your offer to include shorter or longer session times for certain content."**	Leads into the standard Lite Fundamentals engagement but requires custom modifications.
Path 2: Targeted Prospect - Not Sophisticated + Smaller	**IF the client is NOT sophisticated AND fits the 'smaller business' profile...**	**THEN "Approach & Engage using the Lite Fundamentals (Campaign) sales process."**	Deploys the streamlined campaign process.
Path 2: Targeted Prospect - Not Sophisticated + Larger	**IF the client is NOT sophisticated AND does NOT fit the 'smaller business' profile...**	**THEN "Approach & Engage using the Total Needs sales process."**	Defaults to the comprehensive sales approach.

Referral/Walk-in Logic Branch	IF (Condition / Trigger)	THEN (Action / Next Step)	Additional Context / Notes
Referral/Walk-In - Initial Assessment	**IF the lead is a "Referral Received or 'Walk-In'"...**	**THEN evaluate: "Client has specific issue or interest in service offer?"**	Determines if the client has a predefined immediate need.
Path 3: Referral/Walk-In - Specific Issue (Yes)	**IF the client HAS a specific issue or interest...**	**THEN "Solve this client issue but position wider to Loop other service offers in future."**	Addresses immediate pain point while seeding future advisory work.
Path 3: Referral/Walk-In - Specific Issue (No)	**IF the client does NOT have a specific issue or interest...**	**THEN evaluate: "Client fits 'smaller business' profile?"**	Sorts general referrals by business size.
Path 3: Referral/Walk-In - Smaller Business (Yes)	**IF the client fits the 'smaller business' profile...**	**THEN "Approach & Engage using the Lite Fundamentals (Campaign) sales process."**	Deploys the streamlined campaign process.
Path 3: Referral/Walk-In - Larger Business (No)	**IF the client does NOT fit the 'smaller business' profile...**	**THEN "Approach & Engage using the Total Needs sales process."**	Deploys the comprehensive sales approach.

Prepare Your (Campaign) Approach

Approach Method	Relationship Status	Steps to Discovery/ Alignment Meeting	Discovery/ Alignment Meeting Style
Direct Approach – Phone Call	**Warm & Receptive, Open to New Ideas (Easily pass the "How was your weekend?" test)**	1	Growth Curve EOY/ Volatility Review Revenue Model How you rate tables Strategic Planning Template
Pre-Approach EMail (**Quiz/ Video Link**) then Phone Call	**Warm but Wary, still guarded around arena**	3 (1. Phone to ask for permission to send quiz or video link. 2. 'Prime' the client via online quiz or video. 3. Phone to ask for the meeting)	Growth Curve EOY/ Volatility Review Revenue Model How you rate tables
Pre-Approach EMail sequence (depth charges?) then Phone Call, then 'intro' meeting before actual discovery meeting.	**Cool but engages, perhaps multiple decision makers? Need to 'see before they move'.**	3 (1. Educating about the need, via multiple email or webinar. 2. Position the meeting during phone call, 3. Run a 'taster' meeting before 'Deep Dive' Discovery/ Alignment meeting)	Growth Curve EOY/ Volatility Review Revenue Model
Group Positioning – Seminar to introduce concept	**(Group)** **Cool to new ideas, need time to reflect**	2 (1. Invite to seminar, conduct the event & then follow-up to invite to a 2. 'personal discovery session')	Growth Curve EOY/ Volatility Review Revenue Model How you rate tables
