

"30 to 40 Presentation Template"

Benefits:

- **How it helps the business owner:** Delivers a clear, engaging, and easy-to-follow presentation that doesn't overwhelm the audience.
- **How it helps the advisor:** Saves preparation time by utilizing a structured framework that sequences the presentation logically from opening to agenda.
- **Who it may be suitable for:** Presenters, guest speakers, or facilitators tasked with delivering a concise, 30 to 40-minute educational session.

How to use the material in practice:

1. Define your Target Audience and Desired Outcomes at the top of your design summary.
2. Assign each presenter their specific slot using the Content / Why / Remember framework.
3. Draft your opening by establishing a "Connecting story" or preemptively "calling out the ghosts" to build rapport.
4. Formulate your "Why this" and "Why now" statements to justify the presentation's relevance.
5. Detail your Concept and rules of engagement (e.g., how to ask questions).
6. Break down your Content Design into three core Principles, providing three specific Details for each.
7. Transfer this structure into the Agenda Table/Run Sheet, plotting precise times for elements like "Meet & Greet", "Spkr 1", and "Morning tea" to ensure you stay within the 40-minute window.

Common Q&A:

- **What framework is used to structure the presenter's content?** The {Content / Why / Remember} framework.
- **How many details should support each Principle?** There is space provided for three details per Principle.
- **What does M.O.C stand for?** Master of Ceremonies.
- **What should you establish before revealing the agenda?** "How we roll" – setting the scene in terms of how to engage and ask questions.
- **What are you supposed to "call out" at the beginning of the presentation?** The "ghosts".

"Blank Platform Template"

Benefits:

- **How it helps the business owner:** Ensures the audience understands the rules of the workshop and why the material is highly relevant to their survival or success.

- **How it helps the advisor:** Provides a comprehensive "stage-by-stage" script outline that covers connecting, setting the scene, delivering, and closing without sounding arrogant or overly sales-driven.
- **Who it may be suitable for:** Facilitators or advisors stepping onto a stage to run interactive, principle-based workshops.

How to use the material in practice:

1. **Stage 1 (Connect):** Start strong using Universals (shared experiences) or Truisms (indisputable facts). Put yourself in "that moment" using a metaphorical story to build 'a theatre in their mind'.
2. **Stage 1 (Ghosts & Relevance):** Call out negative preemptive thoughts (ghosts). Then frame relevance by linking your concept to their key values: Survival, Security, Acceptance, Recognition, or Contribution (W.I.I.F.M).
3. **Stage 2 (Intro & Scene):** Keep your self-introduction under 1 minute. Set the scene by explaining this is an interactive workshop, introducing the 'park' board for off-topic questions, and encouraging participation.
4. **Stage 3 (Deliver):** Deliver principles using stories, visual aids, and humor. Force engagement by getting attendees to talk to each other to lift the emotional connection in the room.
5. **Stage 2 (Call to Action & Close):** Close the cycle by inviting attendees to a free 'discovery session'. Avoid heavy pitches so you don't slam their minds shut.

Common Q&A:

- **What are "Universals" and "Truisms"?** Universals are shared experiences everyone can relate to (e.g., traffic), while Truisms are indisputable facts verifiable in the here and now.
- **How long should a self-introduction be?** Keep it brief; any longer than 1 minute starts to sound egotistical.
- **How do you handle complex questions that derail the presentation?** Stick them on the 'park' board to come back to later.
- **What is the best way to judge the mood of the room?** By the audience's involvement with you and their ease of connecting with each other.
- **Should you end with a heavy sales pitch?** No, try to avoid heavy pitches; simply invite them to take advantage of a free discovery session.

"Forecast presentation"

Benefits:

- **How it helps the business owner:** Shifts their mindset from viewing budgets as restrictive "diets" to using forecasts for strategic scenario planning and safe growth.

- **How it helps the advisor:** Demonstrates quantitative expertise by explaining bespoke revenue models and volatility reports, proving high value to the client.
- **Who it may be suitable for:** Clients struggling with business limits, negative financial pass-fail mentalities, or a lack of logistical foundations in their numbers.

How to use the material in practice:

1. Open by addressing the "3 Reasons People Don't Use Cash Forecasts": the math is perceived as too hard, revenue is viewed as pass/fail, and budgets feel like restrictive diets.
2. Explain the difference between "Using Average vs Probability".
3. Present the "3 Things We Do Different": quantifying expectations via bespoke models, using Volatility reports to find probability ranges, and building action plans to test and measure.
4. Outline the "3 Advantages For Your Business": identifying the 'Profit Sweet-spot' to avoid over-trading, using Scenario Planning (Plans A, B & C), and knowing when to change direction to limit losses.

Common Q&A:

- **Why is budgeted spending often a negative experience?** It is viewed in the same way as a diet (restriction or 'going without').
- **How do we remove the pass-fail mentality?** By using Volatility reports to determine probability ranges instead of relying on averages.
- **What is the true purpose of the forecasts?** It's about how it helps grow or protect what has been built, not about predicting the future.
- **What does identifying the 'Profit Sweet-spot' help a business avoid?** It helps avoid over-trading (financial limits).
- **How is scenario planning described metaphorically?** "You catch a ball by anticipating where it will land, not by knowing from where it was thrown".

"Funny Stories"

Benefits:

- **How it helps the business owner:** Increases audience attention and retention when communicating company messages or presentations.
- **How it helps the advisor:** Builds immediate rapport, breaks tension, and establishes the advisor as a confident, engaging speaker.
- **Who it may be suitable for:** Speakers looking to inject humor and personality into their presentations or networking events.

How to use the material in practice:

1. **Step 1:** Select a story you genuinely enjoy (personal experiences mixed with slight fiction, or standard/controversial topics handled absurdly).
2. **Step 2:** Ensure the audience can relate to the characters or topics.
3. **Step 3:** Start telling the story with a serious or innocent expression. Do not telegraph that a joke is coming.
4. **Step 4:** Take your time. Use pauses for dramatic effect and employ different voices to create 'theatre in their mind'.
5. **Step 5:** Project your voice with intonation. Be excited, calm down before a pause, then deliver the punch line.
6. **Step 6 & 7:** Practice in front of small audiences to test reactions, then perform when confident.

Common Q&A:

- **What did Mark Twain say about stories?** "There are several kinds of stories, but only one difficult kind - the humorous".
 - **What happens if you don't appreciate the humor in your own story?** Your audience won't find it funny either.
 - **Should you smile or laugh while leading up to the punchline?** No, you should keep a serious or innocent expression and tone.
 - **How can you help the audience use their imagination?** Use pauses for dramatic effect, use different voices, and turn to face the character.
 - **How should you pace your voice delivery?** Be excited at first, calm down a bit before you use a pause, and then come out with your punch line.
-

"Growth Stage Seminar"

Benefits:

- **How it helps the business owner:** Provides a clear map of the business journey, allowing them to pinpoint where they are and what challenges are normal for their current stage.
- **How it helps the advisor:** Acts as a powerful diagnostic and seminar tool to sell targeted advisory services for specific growth stages (e.g., process improvement for Leverage, succession for Exit).
- **Who it may be suitable for:** Prospects or clients attending an educational seminar about scaling, business maturity, or exit planning.

How to use the material in practice:

1. Introduce the "Growth Fundamentals Framework" graphic, showing the journey from Launch to Exit/Decline, including the "Split point" and "Devil's Toilet".

2. Walk through early stages: Stage 1 Design (getting ready to leave your job) to Stage 3 Break-Even (covering costs).
3. Explain the mid-stages: Stage 5 Leverage (delegation/replication) and Stage 6 Reach (multiple locations/brand spread).
4. Detail the late stages: Stage 7 Leapfrog (acquisitions) and Stage 8 Maturity (commanding market share/governance).
5. Discuss Stage 9 Exit/Decline, showing the paths of succession/sale versus dwindling into retirement.
6. Conclude by explaining the 9 Growth Aspects (e.g., Governance, Innovation, Sales) that must be balanced at *every* stage.

Common Q&A:

- **What is the Growth Focus of Stage 2 (Launch)?** Growth through Enthusiasm & Creativity.
- **At what stage is a business sustaining the owner's lifestyle without them being 'hands-on' daily?** Stage 5. Leverage.
- **What is the Growth Focus of Stage 7 (Leapfrog)?** Growth through alliances & acquisition.
- **What are the two potential outcomes in Stage 9?** The owners realize their capital gain via sale/succession, OR the business dwindles as the owners seek retirement.
- **What is the purpose of the 9 Growth Aspects?** To ensure that at each level, the business objectives remain balanced and not overly consumed by the pursuit of growth.

"MFS Drafting Template"

Benefits:

- **How it helps the business owner:** Ensures any message or core philosophy they wish to impart to their staff or clients is structured logically and emotionally.
- **How it helps the advisor:** Provides a tangible worksheet to rapidly draft metaphor stories that naturally lead clients toward the advisor's specific service solutions.
- **Who it may be suitable for:** Presenters preparing tailored stories to introduce complex or sensitive business concepts.

How to use the material in practice:

1. Define the foundational elements: Story Name, the 'Point' of the Story, the Problem/Opportunity it relates to, and the specific Service Solution you are leading to.
2. Draft "The Draw" by filling out three prompts: Capture (e.g., a guessing question), Describe (setting the scene), and Permission (advising the audience they might be shocked or amused).

3. Draft "The Plot" by listing your Story Anchors in logical/sequential order. Try to limit anchors to 5 or less.
4. Write "The Reveal" where you state the explicit Story Point (e.g., "Mental clarity is not enough...").
5. Draft "The Close" summarizing what you want to 'Stick'. Keep this limited to 3 points or less.

Common Q&A:

- What does the abbreviation 'MFS' stand for? Magic Formula Story.
 - What are the three components of 'The Draw'? Capture, Describe, and Permission.
 - How many anchors should you try to limit 'The Plot' to? 5 or less.
 - What should the Story Anchors provide? A sequence or logical order to the story.
 - How many points should you limit 'The Close' to? 3 or less.
-

"Magic Formula Stories"

Benefits:

- **How it helps the business owner:** Helps them communicate culture, values, or corrective feedback to their team in a non-threatening, easily absorbed manner.
- **How it helps the advisor:** Allows the advisor to illustrate technical knowledge, empathy, and credibility without appearing boastful, lowering client resistance ("filters").
- **Who it may be suitable for:** Coaches and facilitators dealing with business culture, personal choice, or complex problem-solving.

How to use the material in practice:

1. Identify the purpose of your story: to Frame (provide context/parallel thinking), Connect (create 'theatre in their mind'), or Position (illustrate credibility without grandstanding).
2. Construct "The Draw": Capture attention via a shocking statement, open loop, or physical movement. Describe the setting, and provide permission for how the audience can engage.
3. Build "The Plot": Relate characters and motives using logical 'anchor statements'.
4. Execute "The Reveal": Facilitate the story to provide multiple meanings, or direct their thinking using metaphor.
5. Deliver "The Close": Bring it to a definitive end with impact, letting the 'king phrase' hang without adding fluffy explanations.

Common Q&A:

- What is the benefit of using 'parallel thinking' in stories? Edward De Bono suggests it is the most critical component in solving problems or developing innovative strategies.

- **Why is storytelling a non-threatening way to present a concept?** It allows individuals to relate via 'theatre in their mind' and choose how much identification they show, providing safety parameters.
- **Why is a story more palatable than grandstanding your qualifications?** Revealing attributes rather than promoting them allows the audience to be impressed with less chance of vulnerability, so they listen with fewer "filters".
- **What should you do with the 'king phrase' in the Close?** Let it hang at the end rather than reducing its impact by context statements or fluffy explanation.
- **If your 'king phrase' needs explaining, what went wrong?** You failed to relate the concept during the "PLOT" stage or the "REVEAL" was weak.

"Paper Tower Model"

Benefits:

- **How it helps the business owner:** Provides a mathematical simulation showing how material costs, time efficiency, and quality (height) directly impact the bottom line.
- **How it helps the advisor:** Automates the complex scoring of the Paper Tower exercise, allowing the facilitator to focus on observing behavior rather than doing math.
- **Who it may be suitable for:** Facilitators running the Paper Tower team-building and business simulation workshop.

How to use the material in practice:

1. Enter the "Cost" of materials used by tracking the number of sheets drawn. Each batch of 20 sheets costs \$2,000.
2. Track the "TIME (Taken in Minutes)". Calculate the profit/loss based on the time scale provided (0 to 10 minutes).
3. Measure the "Height" in mm. Apply the financial metrics where height adds to profit (e.g., 1200mm = \$1,000 profit) or triggers penalties/bonuses (under 300mm = loss of \$6000; over 2400mm = \$10,000 bonus).
4. Combine these three metrics to finalize the total Profit or Loss.

Common Q&A:

- **How much does one batch of 20 sheets cost?** \$2,000.
- **What is the financial penalty if the tower is under 300 mm?** A loss of \$6000.
- **What happens if a team builds a tower over 2400 mm?** They receive an additional bonus of \$10,000.
- **Does time taken affect the profit?** Yes, time taken in minutes corresponds to varying scales of profit or loss.

- What is the initial material cost for 100 sheets? \$10,000.

"Paper Tower Review Questions"

Benefits:

- **How it helps the business owner:** Translates a fun game into profound insights about workplace process, outcome-orientation vs. process-driven behavior, and team personalities.
- **How it helps the advisor:** Provides a scripted, psychological debrief method that smoothly transitions a group from playing a game to adopting a formal 9-step business consulting process.
- **Who it may be suitable for:** Consultants reviewing the aftermath of the Paper Tower exercise.

How to use the material in practice:

1. Have teams calculate their Profit/Loss based on minutes taken, value of materials, and height achieved.
2. Ask initial review questions: "Did you have fun?", "Did you make a profit?", "Where did you go wrong?".
3. Provide specific feedback using exact times (e.g., "At 2.42 into the exercise, Jim said...") and ask about team effectiveness and personalities.
4. Introduce the 9-step process: Appoint Chairperson, Appoint Timekeeper, Determine Objective (SMART), Apportion Time, Brainstorm without assessment, Assess options, Eliminate/Select, Allocate Resource, Prepare/Implement Action Plan.
5. Facilitate a discussion to brainstorm workplace applications for this process and assign an "enforcer".

Common Q&A:

- **What is the formula for calculating profit value?** Number of minutes taken + Value of material used + Value of height achieved = Profit/Loss.
- **How should a facilitator read back observations?** List things seen and heard with the exact time at which they were observed.
- **What are two common areas of failure for teams in this exercise?** Failing to examine all options (poor brainstorming) and inaccurately defining the objective.
- **What does the acronym S.M.A.R.T stand for regarding objectives?** Specific, Measurable, Agreed, Revisable and Time bound.
- **What rule applies during the brainstorming phase?** Strictly no assessment of ideas; avoid language that runs down the idea.

"Paper Tower Task Sheet"

Benefits:

- **How it helps the business owner:** Forces teams to operate under strict constraints of time, material, and rules, mirroring real-world project pressures.
- **How it helps the advisor:** Lays out clear, indisputable rules for the exercise, preventing arguments and ensuring a uniform challenge.
- **Who it may be suitable for:** Participants acting as the "building team" during the Paper Tower workshop.

How to use the material in practice:

1. Hand out the task sheet and explain the objective: build a tower profitably based on materials, height, and time.
2. Set the timer: Allow exactly 20 minutes for preparation/planning.
3. Issue an initial 100 sheets. Allow teams to draw up to 500 sheets total in batches of 20.
4. Enforce constraints: Unused drawn materials count toward the cost. No prefabrication allowed (sheets must be flat at construction start). Only provided materials can be used.
5. Set the build timer for a maximum of 10 minutes.
6. Ensure the tower is self-supporting and remains intact for at least 1 minute after completion before measuring height.

Common Q&A:

- **How long is the preparation phase?** 20 minutes.
- **How long is the building phase?** A maximum of 10 minutes.
- **Can teams pre-fold or prefabricate paper during the prep phase for the final build?** No, prefabrication is not allowed, paper must be flat when building begins.
- **Do unused sheets count towards the total cost?** Yes, once drawn, they count towards the total whether used or not.
- **How long must the tower stand upright to qualify?** It must remain intact and upright for at least one minute after completion.

"Powerful Seminars"

Benefits:

- **How it helps the business owner:** Creates highly professional, targeted marketing events that position their business favorably and drive client acquisition.

- **How it helps the advisor:** Provides a complete end-to-end blueprint encompassing content design, audience psychology, 6-week marketing timelines, delivery styles, and AV logistics.
- **Who it may be suitable for:** Business owners, advisors, or marketing managers designing and hosting public speaking events or workshops.

How to use the material in practice:

1. **Design:** Identify the target audience, define outcomes, and build content using the C.P.D hierarchy (Concept, Principles, Detail). Ensure content relates to Pragmatists, Reflectors, Theorists, and Activists.
2. **Plan:** Follow the detailed 6-week timeline (sending invitations, confirming RSVPs, running rehearsals, sorting handouts).
3. **Delivery Style:** Choose the appropriate style (Educator, Motivator, Coach, Collegiate) based on whether you are Coaching, Presenting, or Facilitating.
4. **Execute Delivery:** Prepare psychologically. Connect with the audience via universals/ghosts. Use Honey & Mumford relevance statements. Describe the theme, introduce yourself, set the scene, layout the agenda, and go to work!
5. **Logistics:** Test all light and sound equipment beforehand. Check mic directionality and ensure overhead lights don't blind the audience.

Common Q&A:

- **What is the Public Speaking Objective?** To position the speaker favorably in the mind of the audience so they seek strategic services.
- **What is the C.P.D hierarchy?** Concept – Principle – Detail.
- **How do you tailor information for "Reflectors"?** Give them time to 'think it over' and direct them to write down their thoughts.
- **What delivery style features a rapid verbal pace and frequent calls to action?** The Motivator style.
- **How should you hold a hand-held microphone?** At about 'sternum level', ensuring your body moves with your head if it is unidirectional.

"Seminar & Entertainment"

Benefits:

- **How it helps the business owner:** Prevents staff from embarrassing the company at functions, ensuring they build professional relationships without coming across as insincere or pushing unwanted sales pitches.
- **How it helps the advisor:** Offers strict protocols for navigating social settings, maintaining integrity on expense accounts, and successfully gathering leads.

- **Who it may be suitable for:** Professionals attending trade shows, corporate dinners, or networking seminars.

How to use the material in practice:

1. Adopt the mindset that it is work, not a free booze-up. Do not overestimate the level of relationship with current clients.
2. Approach with a smile, eye contact, and offer a handshake (waiting 2-3 seconds for a response). Use prepared open-ended one-liners.
3. Work the room: be a "comfortable butterfly," not an "anchor in the corner." Rotate to meet everyone.
4. When joining a group, check body positions and ask permission ("hey guys, would it be o-k if I asked those people over...") to prevent invoking exclusionary tribal instincts.
5. Offer hospitality, keep things safe, and always stay "one drink behind" the client.
6. If a client tries to buy, avoid "Selling out of bounds" by steering the conversation to a future Monday call.
7. Get into 'state' before the event by visualizing a confident posture and voice tone.

Common Q&A:

- **Why is it easier to develop business relationships in social settings?** It removes the façade people establish, making it more comfortable to inquire about personal backgrounds.
- **How should you handle introducing yourself if no name tags are present?** Make eye contact, provide both your first and surname, and say nothing for 2-3 seconds until they respond.
- **What is the "anchor in the corner" mistake?** Planting yourself in one spot with one client instead of rotating around the room to meet everyone.
- **What rule should you follow regarding alcohol at a work function?** Always stay one drink behind your client.
- **Why shouldn't you "sell out of bounds" when entertaining?** You can't control the environment, it makes hospitality seem insincere, and alcohol could lead to buyer's remorse.

"Spaghetti Tower Task Sheet"

Benefits:

- **How it helps the business owner:** A rapid, low-cost team-building exercise that quickly highlights team communication and planning flaws under pressure.
- **How it helps the advisor:** An easily scalable ice-breaker or problem-solving simulation that requires minimal material setup.

- **Who it may be suitable for:** Facilitators needing a short, 30-minute team challenge.

How to use the material in practice:

1. Hand out the task sheet and explain the goal: Build a tower taller than the competitors.
2. Issue exact resources: 20 sticks of uncooked spaghetti, 1 roll tape, 1m string, 2 marshmallows.
3. Start a 20-minute timer for preparation. Allow testing, but strictly forbid prefabrication (components must be flat when building starts).
4. Start a 10-minute timer for construction.
5. Enforce the final rules: The tower must be self-supporting, hold 1 complete marshmallow at the top, and remain intact for 1 minute before measuring height from the surface.

Common Q&A:

- **What is the total time allocated for the Spaghetti Tower task?** 30 minutes (20 mins prep, 10 mins build).
- **What resources are allowed?** 20 sticks of spaghetti, tape, 1m of string, and 2 marshmallows.
- **Is prefabrication allowed during the preparation phase?** No, components must be laid flat on the table before construction begins.
- **What must the tower support at its highest point?** 1 complete Marshmallow.
- **When does timing for the 1-minute intact rule begin?** Immediately after the 10 mins of allocated construction time.

"Team Problem Solving"

Benefits:

- **How it helps the business owner:** Prevents teams from jumping straight to solutions and suffering analysis paralysis, ensuring complex challenges are solved methodically.
- **How it helps the advisor:** Provides an authoritative, 9-step framework supported by institutional research to guide client strategy sessions and ensure accountability via an "Enforcer".
- **Who it may be suitable for:** Facilitators and management teams navigating the transition from problem identification to execution.

How to use the material in practice:

1. Appoint a Chairperson, Timekeeper, and Scribe.
2. Determine the Objective in writing using the S.M.A.R.T format (ensure it states *why* achievement is critical).
3. Apportion time to each stage to prevent analysis paralysis.

4. Brainstorm without assessment: Enforce strict separation of judgment and use mind mapping to foster divergent thinking.
5. Assess options and apply critical filters.
6. Eliminate and Select the best option using tools like the Impact vs. Effort Matrix.
7. Allocate resources (budget, team, time).
8. Prepare an Action Plan and assign an Enforcer to manage the implementation loop.

Common Q&A:

- **What usually undermines team problem solving?** A lack of structure rather than a lack of talent, and jumping straight to solutions without a shared understanding.
- **What is the most frequent point of failure in team exercises?** The premature assessment of ideas during brainstorming.
- **What tool is useful during the 'Eliminate and Select' stage?** The Impact vs. Effort Matrix.
- **Why is the 'Allocate Resource' step critical?** Because a solution without a budget, a dedicated team, or scheduled time is merely a wish.
- **What is the role of the Enforcer?** An individual who takes psychological and operational ownership of the outcome to ensure momentum doesn't dissipate.

"Team Workshop Run Sheet"

Benefits:

- **How it helps the business owner:** Keeps the entire team aligned on the schedule, ensuring long days remain productive and strictly timed.
- **How it helps the advisor:** Provides a plug-and-play matrix to manage the logistics, content, purpose, and required resources for a full two-day workshop.
- **Who it may be suitable for:** Seminar coordinators and facilitators managing multi-day training events.

How to use the material in practice:

1. Fill out the Run Sheet for Day 1 and Day 2, utilizing the provided table columns.
2. Allocate exact "Session Time (mins)" for each block.
3. Set strict "Start" and "Finish" times (e.g., Session 1 from 8:30 AM to 10:00 AM).
4. Detail the "Content", "Purpose", and "Resource Required" for each specific block to keep presenters prepared.
5. Ensure appropriate breaks (e.g., 20 mins morning, 45 mins lunch) and mandatory Management Reviews (10 mins) are scheduled between main sessions.
6. Conclude each day with a 30-minute "Day Review".

Common Q&A:

- How long are the primary workshop sessions? 90 minutes each.
 - What happens between Session 2 and the lunch break? A 10-minute Management Review.
 - How long is the lunch break scheduled for on Day 1? 45 minutes (12:00 PM to 12:45 PM).
 - What activity concludes both Day 1 and Day 2? A 30-minute Day Review.
 - What time does the Day 2 overview start? 9:00 AM.
-

"get.feedback form"

Benefits:

- **How it helps the business owner:** Allows them to quantitatively judge whether a seminar delivered ROI and if their staff found the content relevant.
- **How it helps the advisor:** Serves as a critical lead-generation and quality-control tool to gauge presenter flow, story effectiveness, and secure future attendances.
- **Who it may be suitable for:** Attendees filling out feedback at the conclusion of a seminar or workshop.

How to use the material in practice:

1. Distribute the form to attendees at the end of the presentation.
2. Ask attendees to evaluate if the content was relevant to their business.
3. Ask attendees to assess instructional methods (e.g., did stories make content easier to relate to?).
4. Ask for constructive criticism on content that did not appeal and whether the presenters felt mismatched.
5. Gather operational feedback on the environment/atmosphere, and secure a "yes/no" lead on whether they would attend a future seminar.

Common Q&A:

- **What does the form ask regarding the use of stories?** "Did the use of stories make the content easier to relate to for you?"
- **How does the form address multi-speaker events?** It asks, "Do you feel the content flowed between presenters or do you feel the presentation was mismatched?"
- **Does the form measure technical expectations?** Yes, it asks if the presentation delivered content of a technical nature such that it met expectations.
- **What logistical aspects does the feedback cover?** The overall style, environment, and atmosphere.
- **How does the form generate future leads?** By asking, "would you consider attending a ABC Firm's seminar in future?"

Template Name	Core Focus & Contents
"30 to 40 Presentation Template"	Outlines a concise presentation structure focusing on Concept, Why, and Remember.
"Blank Platform Template"	A framework for ordering presentation thoughts from making connections to call-to-actions.
"Forecast presentation"	Slides explaining scenario planning and probability forecasting versus traditional restrictive budgeting.
"Funny Stories"	A 7-step guide to constructing, practicing, and delivering humorous stories with vocal intonation.
"Growth Stage Seminar"	A seminar detailing the 9 stages of business growth, their fundamentals, and 9 balancing growth aspects.
"MFS Drafting Template"	A worksheet for drafting the Draw, Plot, Reveal, and Close of a metaphorical story.
"Magic Formula Stories"	Explains the psychology and structuring behind using stories to frame concepts and connect audiences.
"Paper Tower Model"	A spreadsheet matrix for calculating the financial profitability of the Paper Tower exercise.
"Paper Tower Review Questions"	Debrief questions and a formal 9-step team problem-solving framework.

"Paper Tower Task Sheet"	The rules, resource constraints, and time limits for the Paper Tower team exercise.
"Powerful Seminars"	Comprehensive guidelines covering seminar design (C.P.D), 6-week timelines, delivery styles, and AV logistics.
"Seminar & Entertainment"	Protocols for appropriate networking, working a room, and hospitality boundaries at corporate functions.
"Spaghetti Tower Task Sheet"	Instructions and material constraints for building a tower from spaghetti and marshmallows.
"Team Problem Solving"	A facilitator's manual outlining a structured 9-step problem-solving process and Enforcer execution.
"Team Workshop Run Sheet"	A minute-by-minute two-day scheduling matrix for running multi-session workshops.
"get.feedback form"	A post-presentation evaluation questionnaire to gather attendee insights and future business leads.
