

Branch Chain Logic Table

Logic Branch	IF (Condition / Trigger)	THEN (Action / Next Step)	Additional Context / Notes
Client Onboarding	IF a firm is preparing to take on a sizable new client...	THEN run the <i>Financial Systems Review</i> (Helicopter View) first.	Identifies internal system flaws early to protect the firm from absorbing unbilled "job creep" and scope variations.
Scaling Intentions	IF the business owner wants to open new branches or acquire a competitor...	THEN present the <i>Systems B4 Scale</i> slides.	Ensures they "get it right before they go big" and establishes visual workflow mappings.
Audit Requirement	IF the Helicopter View uncovers complex issues needing deep analysis...	THEN hand the client over to an internal or external audit team to perform Detailed Discovery.	The general advisor stays high-level if they lack audit expertise, preventing them from asking questions they can't resolve.
System Findings	IF the audit team completes their detailed discovery phase...	THEN they present the <i>Financial Systems Report</i> to the client.	Maps out specific sub-systems requiring 'Urgent Attention' and outlines step-by-step 'Recommended Actions'.
Post-Implementation	IF the client has implemented the recommended changes and a specified time period has passed...	THEN conduct Scenario Testing using the <i>Financial Systems Scenario Report</i> .	Grades the new procedures directly as 'Pass' or 'Failed' to ensure the client achieved their desired outcome.
