

Logic Branch	IF (Condition / Trigger)	THEN (Action / Next Step)	Additional Context / Notes
Discovery Assessment	IF the client has not calculated their future income requirements...	THEN direct them to the Retirement Calculator in the portal prior to moving forward.	Essential to establish baseline readiness; without this, the exiting party cannot know if the business sale will sustain them.
Discovery & Assessment	IF the client submits the initial digital questionnaire...	THEN generate a private report to assess their baseline readiness before scheduling the first meeting.	Helps the advisor identify preliminary gaps in financial/non-financial areas.
Sibling Dynamics	IF there is current family disharmony between siblings...	THEN keep the "Kids' Wish List" document completely hidden from other parties.	Prevents premature conflict before natural constraints are discussed.
Concept Alignment	IF both the Parents' and Kids' wish lists have been collected...	THEN initiate the "Concept Meeting" to place wishes side-by-side and discuss constraints/pros/cons.	Establishes the realization that outcomes won't be perfect and mutual compromise is required.

Asset Transfer Governance	IF the family is defining how assets will be passed down...	THEN formally determine if assets will be legally "owned" by the recipient or governed under "stewardship".	Requires clarifying the separation of powers between ownership, governance, and management.
Disparate Financial Value	IF siblings are slated to receive disparate financial figures...	THEN utilize the 'Salary Sacrifice' table to calculate real-world loss of income for those who provided elderly care.	Must be transparently agreed upon by all parties and anchored by objective rules in a Family Constitution.
Successor Compensation	IF the incoming successor was chronically underpaid while building the business...	THEN negotiate whether a discount should be applied to the final purchase price of the business.	Compensates for "sweat equity" when past wages were not set at a fair market rate.
Financial Structuring	IF stakeholders are moving to the final design phase...	THEN deliver professional recommendations using independent advisors to evaluate fair value, tax, and legal frameworks.	Aligns with IFAC structuring standards; confirms if the transfer costs are debilitating.
Emergency Disruptions	IF an unexpected event (major trauma or life change) disrupts the primary succession timeline...	THEN trigger the emergency "sudden departure" contingency plan.	Relies on the dual-track planning standards outlined by ISO 22301.
