

Organisational Review

Benefits

- **How it helps the business owner:**
 - **Clarifies strategic direction and goals:** Helps the owner define where the business is headed and record the scale dynamics and business performance required to achieve personal income, lifestyle, and daily activity goals.
 - **Improves internal operations:** Enables the owner to develop structured plans focused on improving internal efficiencies, team engagement, or both.
 - **Establishes cultural alignment:** Guides the owner in defining cultural core values, understanding habit drivers, and creating a social contract that makes employees feel safe and engaged.
 - **Structures authority and accountability:** Provides clear organizational hierarchy charts, divisional KPIs, and cascaded operational objectives so every division understands its primary output.
- **How it helps the advisor:**
 - **Facilitates structured consulting sessions:** Gives the advisor an actionable 10-to-15-minute agenda structure to run targeted organizational review sessions with clients.
 - **Evaluates leadership and systems:** Provides diagnostic frameworks (such as the People vs. Process understanding table and Leadership tables) to help advisors pinpoint client operational bottlenecks.
 - **Navigates behavioral change:** Equips advisors with a 5-Step Replacement Habit Plan framework to help clients overcome operational interference (such as compliance deadlines disrupting advisory delivery).
- **Who it may be suitable for:**
 - Business leaders and management teams seeking to clarify organizational hierarchy, roles, and reporting channels.
 - Organizations transitioning between growth stages that need to balance innovation versus quality, efficiency, and consistency.

- Teams experiencing alignment issues, cultural friction, or habit-based operational delays.

How to Use the Material in Practice (Step-by-Step Methods)

1. Set the Session Agenda and Allocations:

- Allocate 10–15 minutes at the start of the session to review the 9 agenda items (Development Stages, Team Insights, People/Process Basics, Leadership Style, Core Values, Habit Drivers, Hierarchy Chart, Divisional KPIs, and Cascaded Objectives).
- Set the explicit objective of the session: improving internal efficiencies, improving team engagement, or both.

2. Evaluate Business Development Stages and Team Insights:

- Review the **Business Development Stages** table to record required scale dynamics and business performance needed for personal income and lifestyle goals.
- Analyze pre-gathered data from the **Internal Team Insights** page to understand staff feedback prior to making organizational decisions.

3. Assess People vs. Process and Leadership Styles:

- Complete the **People vs. Process** table to audit existing systems and processes.
- Determine whether the business strategy requires **Innovation & Creativity** (utilizing open-air debate, flexible hours, flat reporting, and individual rewards) or **Quality, Efficiency, Consistency & Precision** (utilizing discipline, written best practices, closed-door debate, uniform dress codes, and team rewards).
- Fill out **Leadership Tables (1 & 2)** with an open mind to identify personal leadership improvement areas.

4. Define Cultural Values and the Value Hierarchy:

- Establish the organizational **Social Contract** and map out core values across four levels: **Human Needs, Immediate Team Needs, Greater Organisation Needs, and Customer Needs**.
- Document 3 key observable behaviors for each segment in the **Value Segment** table.

5. Implement the 5-Step Replacement Habit Framework:

- Identify current operational habits and their environmental triggers (e.g., compliance deadlines interfering with non-chargeable advisory positioning).
 - Draft a **5-Step Replacement Habit Plan** by defining:
 1. **Reason:** Global perspective for change.
 2. **Trigger:** Localized/self-relevant environmental prompt.
 3. **Micro Habit:** Small, low-risk change.
 4. **Effective Practice:** Repetition of the micro-habit tied to the trigger environment.
 5. **Plan:** Global ongoing management plan.
 - 6. **Establish Reporting Channels, KPIs, and Cascaded Objectives:**
 - Define the chain of command using the **Organisational Hierarchy Chart**.
 - Assign divisional KPIs (e.g., Finance KPI: Monthly Average Cash on Hand and Average Debtor Days).
 - Document divisional operational objectives and assign responsible team members using action plan reminders.
-
-

Org Chart

Benefits

- **How it helps the business owner:**
 - **Diagnoses decision-making blocks:** Highlights cognitive biases (Confirmation Bias, Optimism Bias, Argumentative Theory, Conceptual Hierarchies, and Individual Typologies/Enneagram Harmonics) that impair planning.
 - **Establishes effective meeting rules:** Introduces guidelines such as "Play the Ball, Not the Player" and "Leave Your Baggage Outside" to eliminate passive-aggressive behavior and encourage creative debate.
 - **Clarifies organizational chain of command:** Uses military planning principles to ensure discipline and consistent communication under pressure rather than supporting ego-driven hierarchies.
- **How it helps the advisor:**

- **Identifies psychological friction:** Helps advisors spot behavioral blockers and personality dynamics (such as Enneagram Harmonics: Positive Outlook, Intensity, Competency) that prevent client teams from executing strategic plans.
- **Provides structured facilitation tools:** Equips advisors with collaborative tools (e.g., De-Bono's 6 Hats Thinking) and chairperson guidelines to keep meetings structured, fair, and objective.
- **Standardizes reporting lines:** Helps advisors guide clients in mapping clear reporting structures from Shareholders down to frontline positions.
- **Who it may be suitable for:**
 - Leadership teams struggling with unproductive meetings, personal confrontations, or cynical snipes.
 - Organizations suffering from planning paralysis caused by confirmation or optimism bias.
 - Growing companies needing to formalize shareholder, board, executive, and operational reporting lines.

How to Use the Material in Practice (Step-by-Step Methods)

1. **Identify and Audit Planning Blocks:**
 - Evaluate the decision-making team against the 5 primary planning blocks:
 1. **Confirmation Bias:** Seeking only information supporting predetermined positions.
 2. **Optimism Bias:** Being overly optimistic rather than realistic.
 3. **Argumentative Theory:** Internalized thought processes serving personal needs.
 4. **Conceptual Hierarchies:** Information anchors causing disproportionate attention to certain problem elements.
 5. **Individual Typologies:** Personality coping styles defined by Enneagram Harmonics (Positive Outlook, Intensity, Competency).
2. **Set Up Collaborative Decision Frameworks:**
 - Implement a **Collaborative Framework** such as **De-Bono's 6 Hats Thinking** to align focus during problem review.
 - Establish a **Common Language** so all members share agreed terminology.

- Appoint a **Chairperson/Facilitator** responsible for enforcing timelines, maintaining frameworks, and encouraging equal contribution regardless of rank.
3. **Enforce Meeting Culture Norms:**
- Apply the principle "**Play the Ball, Not the Player**" to encourage creative debate while prohibiting physical/verbal confrontation or passive-aggressive behavior (sulking or cynical snipes).
 - Enforce the rule: "**Leave Your Baggage Outside..!**".
4. **Map Out the Organizational Hierarchy:**
- Apply military chain-of-command principles to build discipline and consistent communication under pressure.
 - Fill out the **People & Their Reporting Lines** chart by defining position flows: **Shareholders → Board → CEO → VPs (Marketing, Sales, Operations, Finance) → Managers/Foremen → Operational Roles** (e.g., Copywriter, Salesperson, Technician, Labourer, Apprentice, Trainer).

Branch Chain Logic Table

Logic Branch		IF (Condition / Trigger)		THEN (Action / Next Step)	Additional Context / Notes
Cognitive Block	Bias	IF	planning or quality decision-making is blocked by Confirmation Bias or Optimism Bias	THEN adopt a structured Collaborative Framework (e.g., De-Bono's 6 Hats Thinking), establish a agreed Common Language, and assign a Chairperson/Facilitator to enforce timelines and equal contribution	Confirmation bias causes teams to seek only supporting data, while optimism causes unrealistically high expectations.

Personality Typology Risk	/ IF team members react to risk and adversity based on distinct Individual Typologies / Enneagram Harmonics (Positive Outlook, Intensity, or Competency)	THEN adjust facilitation strategies to account for varying coping mechanisms and conceptual anchors	Conceptual hierarchies and anchors cause different individuals to pay attention to different problem elements.
Passive-Aggressive Meeting Behaviour	IF meeting culture deteriorates into passive-aggressive behaviour (such as sulking or cynical snipes) or confrontation	THEN enforce the "Play the Ball, Not the Player" meeting rule, require open hearts/open minds, and demand that members "Leave Your Baggage Outside..!"	Creative debate requires healthy individuals operating without verbal or physical confrontation.
Strategic Leadership Style: Innovation	IF the business strategy prioritizes Innovation and Creativity	THEN build team practices around open-air debate, questioning decision logic, flat reporting structures, flexible hours/WFH, relaxed dress codes, and individual commercial incentives	Leadership practices must reflect genuine business advantage rather than personal manipulation preferences.

Strategic Leadership Style: Precision		IF the business strategy prioritizes Quality, Efficiency, Consistency, and Precision	THEN build team practices around strict discipline, adherence to written Best Practice rules, closed-door debate, fixed hours, uniform dress codes, and team performance celebration	Rewards in this model focus on team performance and salary reflecting position authority.
Value Conflict	Stack	IF values clash within the organization	THEN define the Cultural Core Values Hierarchy pyramid ordered by priority: Human Needs → Immediate Team Needs → Greater Organisation Needs → Customer Needs	Values function as needs; everything is important until it clashes with another value.
Operational Interference / Job Creep		IF compliance work deadlines run interference with plans to deliver non-chargeable advisory positioning work	THEN deploy the 5-Step Replacement Habit Plan by identifying environmental triggers, establishing a micro-habit, practicing repetition in trigger environments, and maintaining a global management plan	Negative side effects persist due to subconscious environmental triggers that require structured habit replacement.

Organizational Alignment	IF organizational communication or discipline breaks down under operational pressure	THEN restructure reporting lines using chain-of-command principles in the Organisational Hierarchy Chart	Chain-of-command structures exist to ensure consistent communication under pressure, not to support glorified hierarchies or egos.
