

Planning Outcomes

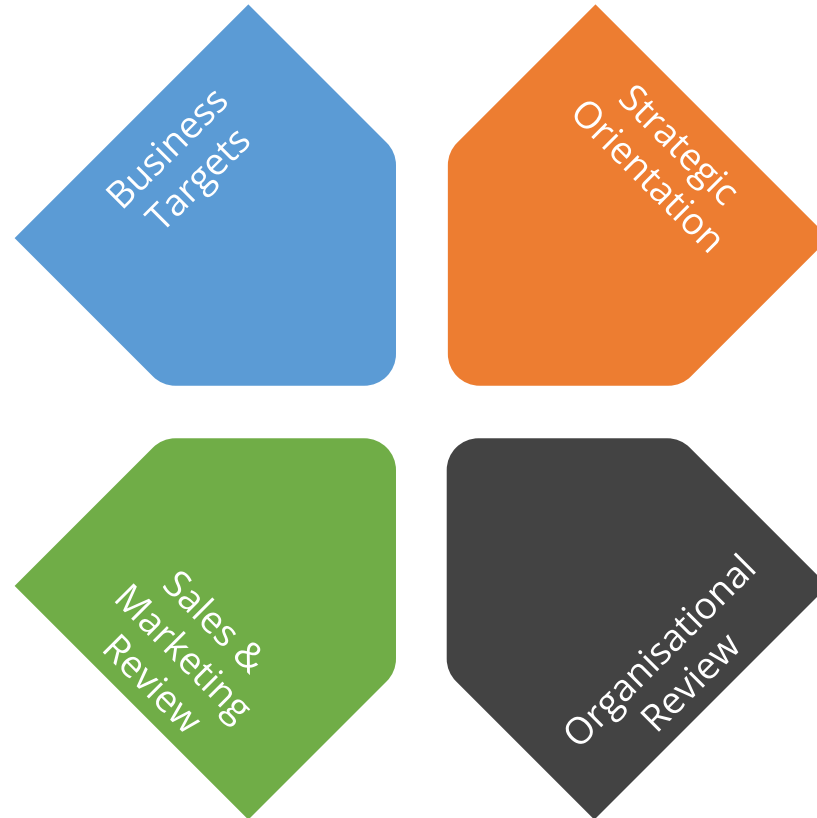

What Do You Want From Your Session?

Our Session Objective

Welcome, it's all about you and your business today...

- Everyone contributes to collaborative thinking.
- Planned Breaks & Housekeeping
- **My/Our Role in the Planning Session is to Challenge What You Believe To Be True!**
- **Your Role is to be Ready To Explore Issues/ Ideas With an Open Heart and an Open Mind.**
- The Objective (expectations) for Today's meeting is that we 'Discover What We've Been Missing'!
- Record what we learn.
- Build an action plan going forward.

The 4 Planning Domains

The Planning Domains Explained:

Business Targets Plan:

A broad plan listing (Sequential) Revenue Targets, Profit Targets, Personal Income Targets, Debt Ratio/Risk Tolerance, Work Hours/Leave Expectations & Specific Focus Areas that you believe require attention within your business.

Strategic Orientation Plan:

A (challenging) review of your actual Business Model including Revenue Streams, Application of Assets and your Target Market. This is supported by External Insights Data and Scenario Modelling to support discussion that may include Market Extension, Product Diversification, Alliance or Acquisition/Sale

Organisational Review:

A specific review of Communication & Reporting Channels, Divisional Roles and Individual's Responsibilities **in order to improve** Efficiencies and Team Engagement. This is often supported with Core Values, Internal Insights Data and Cascaded Operational Objectives (Broken down into each layer of team, then person)

Sales & Marketing Review:

A specific review of How You Attract Attention to your Product or Service, How you then CONVERT Attention into Interest & Action so that finally, you secure their Custom. This includes Product features/improvement, Pricing, Packaging, Messaging Mediums (Social Media vs. Mainstream), Target Customer Review, Brand Imagery, Distribution Options (Alliances), Customer Loyalty Programme

Business Targets:

A broad plan listing;

- ☐ (Sequential) Revenue Targets
- ☐ Profit Targets
- ☐ Personal Income Targets
- ☐ Debt Ratio/ Risk Tolerance
- ☐ Work Hours/ Annual Leave Expectations
- ☐ Specific Focus Areas that you believe require attention within your business.

This includes;

- ☐ Business Owners Expectation table
- ☐ Business Development Stages table
- ☐ 8 Profit Levers table
- ☐ Scenario Modelling (Revenue Model)

Strategic Orientation:

A (challenging) review of your actual Business Model including;

- ☐ Revenue Streams
- ☐ Application of Assets
- ☐ Your Target Market
- ☐ Market Extension
- ☐ Product Diversification
- ☐ Alliance / Acquisition / Sale

This is supported by

- ☐ External Insights Data
- ☐ Scenario Modelling

Strategic Orientation 1 (Session Scope)

Framework	Concept Summary	Helps Your Client To...	Include (Yes/No)
Porter's 5 Forces	This concept explores how Customer Trends, Supplier Tactics, New Entrants and New Substitute/Alternative products can all impact your business at the same time.	To look out for changes in the market and anticipate how everyone will react; so you can be ready to take advantage of the situation.	
Progression of Economic Value	This concept explores the 'Business Imperatives' that relate to each stage of the value chain and suggests that the 'bright new thing' becomes the 'minimum standard' in the future.	To identify what to focus on, depending on how they 'add value' to their customer.	
Vertical Integration	This concept explores the supply and distribution chain to see if you need to own more of the value chain components.	To identify asset purchases or alliances that could help protect existing market share and sales margin or new products that could increase your sales.	
Horizontal Integration	This concept explores the additional products or service that you could cross-sell to existing customers or would attract new customers to your business.		
Market Diffusion Theory	This concept explores the introduction of a new product (similar to product life cycle) but focuses on how the market reacts and the 'tipping point' required to achieve success.	To identify where they are in the marketing process so they don't waste money in the wrong areas. <i>(kind of like the law of diminishing return / flogging a dead horse)</i>	
Revenue Streams	This concept explores using unrelated products to increase foot traffic or shorter sales cycle offerings, vs related upsell or 'after sale' offerings.	Help your client to explore possible revenue alternatives or ways to diversify, whilst minimizing risk.	
Risk Reward Matrix	This concept explores the idea that risk can be categorised into 'Knowns', 'Partial Unknowns' and 'Complete Unknowns'.	Identify new opportunities relating to market expansion and product diversification by only testing one 'unknown' at a time.	
E. Deming's Volatility Theory	This concept explains how Volatility can be measured in terms of Probability and therefore, can be a better 'predictor' of events going forward.	Develop more meaningful targets and reports.	

Strategic Orientation 2 (Session Scope)

Framework	Concept Summary	Helps Your Client To...	Include (Yes/No)
Product Life Cycle	This concept explores how a new product or service becomes popular (gains acceptance) and then over time, becomes outdated and no longer relevant. (Decline)	Understand the likelihood of your client's product or service being replaced (or eroded) by new product offers, new technology or product substitutes.	
Technology Points	This concept explores how a product goes through stages of finding the right price point to improve market acceptance; how the cost of production comes down as sales volumes go up; that increased sales often result in lower sales prices and that eventually, big name brands will drop out and move to the next new thing.	To identify the 'forces at play' surrounding their product (or service) and to identify the opportunities (and threats) that could emerge in future. (Luck is often defined by preparation and timing)	
Sigmoid Curve	This concept explores the natural 'highs and lows' of a product and to identify the signs that it's time to make change. It also suggests the time to invest in new ideas is while you're still enjoying positive cash flow from your existing product.	Look ahead and plan the investment/ improvement / development of your product now, BEFORE sales are dropping and you don't have the cash to afford the necessary changes.	
Blue Ocean Strategy	This concept explores how you can attract customers that wouldn't normally purchase your services or product.	To explore ways to make your business, product or service stand out from all your other competitors.	
Senge's Circles of Causality	This concept reminds us of how the 'equal and opposite reaction' law (in Physics), applies to business improvement also.	To expect the negative consequences in advance so they don't get confused and change their plans (when they should have kept going)	
The 8 Profit Levers	This concept explains the Accumulative effect of Incremental changes in business activities.	Identify the 'little things' that can contribute to massive business growth.	

Organisational Review:

A specific review in order to improve Efficiencies & Team Engagement by focusing on:

- ☐ Communication & Reporting Channels
- ☐ Divisional Roles
- ☐ Individual Responsibilities

This is supported by

- ☐ Core Values (Hierarchy)
- ☐ Internal Insights Data
- ☐ Cascaded Operational Objectives (Broken down into each layer of team, then person)

Sales & Marketing Review:

A specific review of How You Attract Attention to your Product or Service.
How you then CONVERT Attention into Interest & Action so that finally, you secure their Custom.

This includes:

- ☐ Product Features/ Improvements
- ☐ Pricing
- ☐ Packaging
- ☐ Messaging Mediums (Social Media vs. Mainstream)
- ☐ Target Customer Review
- ☐ Brand Imagery
- ☐ Distribution Options (incl' Alliances)
- ☐ Customer Loyalty Programme

Sales & Marketing 1 (Session Scope)

Page	Framework	Concept Summary	Helps Your Client To...	Include (Yes/No)
5	6 Marketing Questions	This concept explores 6 key questions to ensure you've considered your value from the customer's perspective.	Get clear in your own mind about who you serve, how you add value and what makes you special. (Know what matters)	
7	Product Fit	This concept explores the 'trade-offs' between business profitability and customer acceptance.	Increase sales conversions from the marketing leads you generate. <i>(Even your sub-standard salespeople should be able to win sales with your product or service.)</i>	
10	10 Marketing Messages	This concept explores 10 marketing statements that 'speak' to the purchase decision points of your customer.	Convert what you've defined (in the marketing questions) into 'sticky' outbound marketing messages. (Know how to explain it to others)	
12	A.I.D.C.R.A Advertisement Framework	This framework explains the logical order to construct an advertisement.	Build more effective adverts and have a review framework so you can 'A' and 'B' test if desired.	
15	Digital Funnel Storyboard	This concept explores the sequential offerings, messaging and responses, to entice your target customer 'from their couch to your cash register'.	Get clear on how to utilise all their marketing assets in one comprehensive plan.	
20	(Outbound) Messaging Plan	This framework helps you schedule your messaging activities and explores Medium, Platform, Time & Cost as planning considerations.	Execute an effective campaign amongst all other business activities/ responsibilities.	
24	(Inbound) Landing Page Review	This framework defines the reader's logic and the landing page logic, to help you define the sequence of text, graphics & widgets.	Build an effective landing page to convert more of your marketing leads into sales opportunity.	
29	Sparketing (Friction) Review	This concept explores a review of your product from a 'what stops people from buying it?' vs features/ profitability.	Get clear of what your customer will happily pay for, what they could care less about & what they just don't want from you.	

Sales & Marketing 2 (Session Scope)

Page	Framework	Concept Summary	Helps Your Client To...	Include (Yes/No)
31	Branding Review	This checklist helps you align your logo, graphics, message, market promise and 'story' so that you 'stick' in your customers mind.	Build powerful mental associations that create lasting influence in the mind of your target customer.	
33	Customer Loyalty Programme	This checklist helps to clarify the purpose of your customer loyalty programme and ensure it translates into profits for your business.	Stop giving stuff away if it doesn't make a measurable improvement in your business profits.	
35	Pricing	This checklist encourages a review of your pricing beyond just 'lifting it up' or 'dropping it down'. Your price should be an active reflection of the value you provide your customer.	Money is an exchange of value; you need to be clear on the value you offer to price in a sustainable fashion.	
37	Packaging/ Bundling	This checklist guides you through a review of how your packaging supports your 'big promise' and client perception.	Use packaging and bundled solutions to influence the purchasing decision, price point and quality perceptions of your product/ service.	
39	Sales Channel Options	This checklist explores the different sales channel options and encourages a pros and cons discussion.	Identify a variety of ways to engage salespeople to sell your products or service to a wider market.	
41	Sales Process Review	These templates encourage a review of the sales process from both customer and salesperson perspectives.	Know what to say and when to 'say it' to help a customer choose to do business with you.	
50	Drafting Tender Proposals	Just a few notes/ ideas to incorporate in your tender applications as you see fit. (General reading rather than focused session)	Just a few notes/ ideas to incorporate in your tender applications as you see fit. (General reading rather than focused session)	

In Preparation of Your Planning Session

Be clear on what you want to 'walk away with' from the session BEFORE you start. Arrive prepared; have supporting reports/software models and past planning documents with you.

If you wish to combine different planning frameworks then CONSIDER their inter-relatedness; decide the best order in which to approach them.

Recognise that often, not all information is present at the time of planning and that when challenging beliefs about your business, you may need time to 'retire and reflect' on things. Break your planning programme into different sessions or spread it over different days.

Collaboration is the key; make sure that the facilitator draws on everyone within the room and that sound problem solving techniques (such as 6 hats thinking) are used to reduce the effect of dominant personalities.

Use contrast models (Before – Present – Future) to help achieve contextual understanding and make sure the notes are well recorded. Stop every half hour (or so) and have the 'notes taker' read out the significant points/decisions made since last reviewed.
