

Get the Job - Marketing:

This content is designed to help accountants transition from basic tax compliance to high-value consulting and is suitable for those looking to enhance client relationships, effectively frame their services as aspirational, and provide meaningful strategic oversight. The content is primarily of a STRATEGIC and COMMUNICATION nature and therefore, serves as a turnkey system equipped with communication templates, predictive modeling, and legal safeguards to help advisors protect intellectual property, identify growth opportunities, and prevent financial "surprises".

The material is of an entry level and suits new and experienced advisors alike.

1st Response & Proposal Templates

- Benefits: These templates provide a structured, "Agile Theory" approach to project management, breaking engagements down into manageable "sprints" (Feasibility, Planning, Implementation).
- How it helps the business owner: It reduces the financial risk of committing to a large, expensive project upfront by focusing on a \$5,000 initial feasibility stage (requiring about 5 hours of their time) to assess structural integrity before finalizing budgets.
- How it helps the advisor: It establishes clear expectations, secures initial paid work, and positions the advisor as a strategic partner who systematically reviews critical business functions (Planning, Data Management, Marketing, etc.).
- Suitable for: Prospects and existing clients inquiring about large projects or new advisory engagements.

Marketing Campaigns, Quizzes & Video Hyperlinks

- Benefits: These assets automate outreach and act as a "micro-step" between an initial approach and a formal meeting. They utilize video links and quick quizzes to prompt discussions around cash forecasting, business planning, and growth fundamentals.
- How it helps the business owner: It quickly focuses their attention on seasonal risks (like the "perfect storm" of tax and holidays) and encourages them to assess their business assumptions without taking up too much time (e.g., 3-minute quizzes).
- How it helps the advisor: It generates qualified leads, "primes" clients for the theme of an upcoming meeting, and drives inquiries for advisory services without requiring heavy manual sales efforts.
- Suitable for: Existing clients needing a nudge for quarterly planning, or new prospects who need warming up before a sales call.

90-Day Best Practice Training Outreach

- Benefits: Offers a structured, 4-to-5-session training plan delivered via Zoom to teach clients how to use software platforms like Xero properly.
- How it helps the business owner: It trains their administrative staff on correct coding, transaction handling, and quality control, helping them avoid costly mistakes and "surprise" tax bills from the IRD.
- How it helps the advisor: It proactively solves the "birds-nest nightmares" that advisors usually have to clean up at year-end, while creating a new revenue stream (\$1,500 - \$1,800) paid in monthly installments.
- Suitable for: Business owners utilizing digital accounting software who lack formal bookkeeping training or have inexperienced admin teams.

Crisis Management (COVID-19 Email & Phone Scripts)

- Benefits: Provides a compassionate, structured framework to reach out to clients during economic lockdowns or supply chain shortages.
- How it helps the business owner: It helps them model "Good, Bad & Ugly" revenue scenarios and prepares them to secure bank funding before credit divisions are overwhelmed. It provides clarity by focusing them on one of three core functions: Getting Organised, Getting the Job, or Doing the Job.
- How it helps the advisor: It demonstrates immense value and empathy during a crisis, cementing the client relationship at no initial cost, which often leads to future paid programming.
- Suitable for: All active clients facing sudden economic downturns, lockdowns, or severe market disruptions.

Portal Invitations & System Checklists ("Let the Software do the Lifting")

- Benefits: Email templates ranging from direct to conservative ("mental gym" metaphor) that invite clients to the Advisor-e portal, alongside internal checklists for setting up these accounts via Xero API.
- How it helps the business owner: Grants them 24/7 access to a centralized hub for meeting agendas, action plans, and business improvement templates to help them solve problems and lower stress.
- How it helps the advisor: Standardizes the firm's onboarding process, tracks client engagement, and provides a professional "cloud-based" interface to host their value-added services.
- Suitable for: New or existing clients transitioning to the firm's advisory software platform, as well as internal staff managing client setups.

Third-Party Collaboration & Legal Templates (Consent, Banker Login, NDA)

- Benefits: Formalizes relationships with external parties. The NDA protects intellectual property, while the consent templates allow external advisors (like bankers) to view the client's financial dashboards.

- How it helps the business owner: Improves transparency and trust with lenders, potentially helping them secure funding faster by bringing their banker into their "exposure dashboard". Protects their confidential data during project evaluations.
- How it helps the advisor: Builds referral networks with bankers (who may send unattached clients their way) and legally protects the advisor's proprietary methods.
- Suitable for: Clients requiring bank loans, external banking partners, and prospects evaluating custom software projects.

Website Blurbs & Messaging Plan

- Benefits: Provides ready-to-use copy for website "bands" (attention, problem, position, solution) and slide decks to map out global messaging plans and timelines.
- How it helps the business owner: Clearly and persuasively communicates what the firm can do for them, answering their core questions (e.g., "How much is enough?") in the first 7 to 20 seconds of visiting the site.
- How it helps the advisor: Saves hours of copywriting, ensures all social media, blog, and website marketing is aligned to target market problems, and positions their services (from Basic Accounting to Legacy Packages) in an aspirational way.
- Suitable for: Accounting firms looking to revamp their websites, align their team's marketing efforts, or build a comprehensive communication timeline.

Table of Templates Listed as Sources

Template Name	Core Focus & Contents
1st Response Email	Explains the "Agile Theory" project management approach, broken into Feasibility, Planning, and Implementation sprints. Outlines expectations, including an initial \$5,000 feasibility stage requiring 5 hours of the client's time.
3rd Quarter Campaign.	Outreach materials (email and text scripts) focusing on cash forecasting and business planning. It aims to secure working capital reviews ahead of the holiday "silly season" using automated video links.

90 Day BP Acct	A 90-Day Best Practice training plan for clients' administrative staff. Outlines 4 to 5 Zoom sessions covering software coding, transaction generation, monthly quality control, and a 90-day close-off to prevent costly accounting errors.
Bankers login email.	A short email providing bankers or external advisors with a registration link to the Advisor-e platform, facilitating secure collaboration and encouraging mutual client referrals.
Covid Email & Phone	Crisis management templates (3 emails, 2 phone scripts) offering free tools to model "Good, Bad & Ugly" cash flow scenarios. Helps clients secure bank funding and focus on core functions during sudden lockdowns.
Get. TCM.Quiz link email	A brief email providing a link to a 3-minute quiz designed to help business owners focus on their priorities for the next 90 days.
Get.Cartoon Images	A slide deck containing visual business metaphors (e.g., planes, sharks, rafts) and models mapping out concepts like the Growth Curve, the "Devil's Toilet," and the "Profit Sweet-Spot".
Get.Invitation email	Three email variations (from direct to conservative) welcoming clients to the "cloud-based" Advisor-e portal. It frames the software as a "mental gym" to store meeting agendas, templates, and action plans.

Get.Messaging Plan		A slide deck guiding a firm's global messaging strategy. It helps identify target market problems, establish core "Concept Domains," and build a broad timeline for marketing and seminar activities.
Get.XYZ confidentiality	Mu	A formal Mutual Confidentiality Agreement (NDA) template protecting intellectual property and sensitive financial information when sharing data for a project evaluation or software application.
Let the Software do Lifting		Internal firm checklists for creating client portal accounts via Xero API, importing financial data, tailoring content menus, and conducting a 15-minute client orientation session.
On-Line Quiz Summary		A presentation detailing three online quizzes (Growth Fundamentals, What's Applicable, HR Maths) used as "micro-steps" to qualify prospects and prime them for upcoming sales meetings.
Video Hyperlinks		A repository of Vimeo links covering topics like succession planning, cash forecasting, and pricing vs. leakage. These are intended to be sent directly to clients or embedded in email signatures.
Website Blurbs		Copywriting templates mapping out a website homepage into "bands" (attention, problem, position, solution). Includes service descriptions and an aspirational "ascension diagram" showing packages from Basic Accounting to Legacy.

client extadv consent

An email template securing the client's formal consent for privacy compliance, allowing an external advisor (like a banker) access to specific portal pages such as the Covid-19 section and Loan Estimator.

Step-by-Step Execution in Practice

Step 1: Internal System Preparation (The "Lifting") Before contacting clients, use the Xero API to mass-create business entities in your advisory portal. Import their cash volatility and financial performance data so their dashboards are ready before they ever log in. Customize the "Client Service Plan" to hide or lock modules they don't need yet.

Step 2: The "Micro-Step" Outreach Identify a list of target clients. Embed a specific "Video Hyperlink" (e.g., the "Bags of Cash" video for cash forecasting) in your email signature, or send a targeted text message containing a link to the 3-minute "Growth Fundamentals" online quiz. Monitor the results to identify warm leads.

Step 3: Portal Invitation & Follow-Up For clients who engage with the quiz or video, send one of the "Get.Invitation" emails. Frame the software as a "mental gym" to lower intimidation. Follow up within 48 hours using the provided phone scripts to secure a 15-minute software orientation session via Zoom.

Step 4: Formalizing the Engagement Once the client is in the portal, use the visual models (like the Growth Curve or Capacity Models) to discuss "Best Probable" revenue scenarios. If their underlying data is messy, pivot to selling the "90-Day Best Practice Plan" to train their staff. If they have IP to share or require external funding, immediately deploy the Mutual Confidentiality Agreement or the External Advisor Consent forms.

5 Common Q&A for Practice Implementation

Q1: What if a client ignores the portal invitation email?

A: Treat the software release as a process, not a single event. The templates recommend a multi-channel approach: send the initial email, follow up with a text message reminder, and call them within 48 hours to personally walk them through their first login and explain *why* it benefits them.

Q2: I'm not comfortable "selling" advisory services. How do I start?

A: Rely on the "Micro-steps." Instead of asking for a \$5,000 engagement upfront, send a 3-minute online quiz or a short Vimeo link. These assets do the selling for you by highlighting the client's operational gaps. When you meet, you are simply reviewing their quiz results.

Q3: How do we price the 90-Day Best Practice training?

A: The templates suggest standardizing the fee at \$1,500 + GST for local traders, and \$1,800 + GST for businesses trading internationally. To reduce friction, this should be billed in 3 monthly installments to ease the client's cash flow.

Q4: When is the right time to introduce the Mutual Confidentiality Agreement (NDA)?

A: The NDA should be introduced during the "Feasibility" stage of a new project, specifically when a client or prospect needs to share sensitive operational data, or when you are revealing your firm's proprietary consulting frameworks (Intellectual Property) to map out a custom software application.

Q5: How can I use these tools to generate referrals?

A: Use the "Bankers login email" and the "External Advisor Consent" template. By inviting a client's banker into their secure "Exposure Dashboard" to view cash flow scenarios, you build transparency for the client and establish a relationship with the banker. The templates include a specific script reminding the banker that you accept referrals for advisory work without requiring the client to leave their existing compliance accountant.
