

Advisory Engagement: If-Then Logic Table

Logic Branch	IF (Condition / Trigger)	THEN (Action / Next Step)	Additional Context / Notes
Data Integrity / Administration	IF the client frequently submits messy records or says, "My admin team struggles with Xero"...	THEN introduce the "90-Day Best Practice Plan". Explain the cost of "unwinding" bad transactions at year-end.	Bill at \$1,500 (or \$1,800 for international) over 3 months. Conduct via Zoom so the advisor can watch the staff's practical inputs.
Cash Flow / Volatility	IF the client states, "We are making sales but there's never any cash in the bank"...	THEN send the "Bags of Cash" video hyperlink and follow up within 48 hours to offer a Cash Volatility Review.	Import their cash volatility data via the API to generate a report showing their working capital cycle before the meeting.
Growth / Strategic Planning	IF the client says, "I want to step back from the tools and scale the business"...	THEN send the "Growth Fundamentals" online quiz to assess their current baseline, followed by the "Mental Gym" portal invitation.	Use the "Get.Cartoon Images" (like the Growth Curve or "Profit Sweet-Spot") during the meeting to visually map their next phase.

External Funding / Bank Support	IF the client indicates, "We need to secure a loan to purchase new equipment"...	THEN secure "Client Extadv Consent" and send the "Bankers Login Email" to grant their bank manager access to the Loan Estimator.	Helps secure funding faster by demonstrating high-level financial governance. Positions the advisor as a strategic partner to the bank.
Hesitant / Unqualified Prospect	IF a new prospect asks for your services but seems resistant to committing to a paid meeting...	THEN utilize the "What's Applicable" or "HR Maths" Micro-Step Quizzes.	This acts as a low-friction qualifier. If they won't invest 3 minutes into a free quiz, they are unlikely to invest in a premium advisory package.
